

Cirrus Aircraft Pump Eligibilities

Weldon's Cirrus Aircraft eligible pump is designed, built, and tested to meet the demands of the aircraft. Whether original to the application or as a replacement, the same attention to quality is delivered.

Weldon pumps are built to the highest AS9100 standards and offer the quality and safety you are looking for in a pump. We provide a two-year warranty on new pumps and a one-year warranty on factory overhauled pumps when used in the intended application.

Weldon Pump Number

18050-2B8

Airframe Eligibility

Cirrus SR20, SR22

Replaces

5217-00-3

Usage

Fuel Boost

High Boost Minimum Capacity

42 GPH (247 PPH) @
16 PSIG @ 28 VDC

High Boost Max Full Relief Pressure (No flow)

23 PSIG @ 28 VDC

Low Boost Capacity

19 GPH (112 PPH)
4-6 PSIG @ 28 VDC

Test Fluid

Aviation Gasoline

Max Current Draw

4.0 Amps @
28 VDC

Port Size

-8
